Claims 1-17 are pending in this application.

DETAILED ACTION

Claim Objections

1. Claims 5-17 objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim should refer to other claims in the alternative only, and/or, can not depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 5-17 not been further treated on the merits.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 17 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. Claim 17 provides for the use of a 1H-pyrazolyl-ethyl-indolium derivative, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claim 17 is rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Brack et al. (US 3,770,727).

Brack et al. (US' 727) teaches a dyeing compounds having formulae identical to the claimed formula (I) as claimed in claims 1-4 (see cols 13-14, Examples 1 and 2), wherein the claimed formula (I), R1 is alkyl radical (CH3), R2, R3 and R4 are hydrogen atoms, R5 is an aryl radical or aryl radical substituted with a radical R which is alkoxy radical as claimed in claims 1-4. Brack et al. teaches all the limitations of the instant claims. Hence, Brack et al. anticipates the claims.

7. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by GAF CORP [GENA], (DE 2345462 A).

GAF CORP [GENA] teaches a dyeing compound having a formula identical to the claimed formula (I) as claimed in claims 1-4 (see page 2, formula 1), wherein the claimed formula (I), R1 is alkyl radical (CH3), R2, R3 and R4 are hydrogen atoms, R5 is an aryl radical and wherein the reference' formula (I), R2, R3 and R4 are hydrogen atoms, R1 is alkyl radical and R5 is optionally substituted aryl radical as claimed in claims 1-4 (see English abstract of the patent DE 2345462 A). GAF CORP [GENA] teaches all the limitations of the instant claims. Hence, GAF CORP anticipates the claims.
